Your Name: _____ Title: _____ Fax: _____

Is a drawing available: _____

Spiral-Wound Coil Brushes

A continuous brush strip is spirally wrapped to form a cylindrical brush. The brush is then mounted onto a shaft for use. Cores can be disposable or reusable, depending on various factors.

Replacement brush coils are available for field installation on reusable cores.

A wide variety of materials, densities and sizes are available to satisfy a wide range of applications, including scrubbing, finishing, polishing, applying, spreading and removing.
